

Nicola Ward

I really enjoy delivery in highly complex and challenging situations, including successful strategy development and senior operational leadership during the Covid-19 pandemic response. I have significant experience as executive on-call across the region, as an enabler of system engagement and local innovation projects and delivery of multiple, multifaceted improvement and transformation programmes. I am very passionate about leadership development and the future for diverse leadership in the NHS, and as well as being a trained coach and mentor and a regional 360 facilitator I endeavour to support and enable colleagues interested in leadership development in my day to day work.

I am an NHS leadership academy graduate, educated to Master's Level and degree level scientist. I have 22 years senior leadership experience across the NHS, including organisational strategy development, service integration, transformation, senior operational leadership, programme management, quality cost improvement, commissioning, and business development. I am currently on secondment with Cambridgeshire and Peterborough Integrated Care System (ICS), leading the development of ICS strategy.
